

Turbodrain — Granular Drain Cleaner

For when the water stops going down. Granules, not liquid.

BH0228

In short

- 1 kg, granular
- Ultra-concentrated formula for blocked pipes
- Removes grease, oil, hair and soap residue
- Acts without affecting the pipes themselves

How to use it

Remove standing water from the basin with a sponge. Pour 50–100 g into the drain and immediately follow with half a litre of hot — but not boiling — water. Leave for 15 minutes, then rinse thoroughly with cold water. Repeat for a stubborn blockage; if it persists after the second try, call a plumber.

Worth knowing before you buy

- DANGER. Causes severe skin burns and eye damage. May be corrosive to metals.
- Wear protective gloves, eye protection and protective clothing. Do not breathe the dust or fumes.
- If it gets in the eyes: rinse cautiously with water for several minutes, remove contact lenses if easy to do, keep rinsing, and call a poison centre or doctor immediately.
- Hot water, not boiling — boiling water with this product is the mistake people make.
- Contains sodium hydroxide.
